## Hosting Package Details

### One Page (Contact us for prices)

Our one page hosting package is only for hosting websites that contain just one page. A one page site can be used as a portfolio to display your products, to provide contact details or directions to clients, or to advertise special offers. A one page site is a great way to reserve your own domain name and provide information to potential clients, without the cost of a full website. Please contact us for further information and prices.
