## One Page Web Site

**Get your own piece of the web for just £10 a month or £110 for a year.**

A one page web site is the simplest and most cost effective way to get your business on the Internet.

It can be used to demonstrate your products or services and display your contact details to your customers.

A one page web site consists of your own text and images, plus a contact form at the bottom of the page so that potential and existing customers can email you directly from your web site.

You can include up to 1200 words of your own text on the site, as well as up to 10 photos. It's also important to include contact details such as your email address and phone number. One of the advantages of having your own web site is that your email address will be the same as your web site address. So, if your web site is [www.climbinghelp.com](http://www.climbinghelp.com) your email address can be *anything@climbinghelp.com*.

Your one page web site comes with up to 3 different email addresses, so for example you could have *mail@* *john@* and *joe@*. Any email received at these addresses can be viewed and replied to on-line, or automatically forwarded to email addresses of your choice.

Having a one page web site will enable people to be able to find you on the internet, will make you look professional, and will reserve your domain name for the future, so when you want to grow your business you already have a on-line location.

You can view a demo one page web site at [www.climbinghelp.com](http://www.climbinghelp.com)

To discuss your own web site just email [rob@rwwd.co.uk](mailto:rob@rwwd.co.uk) or call 07732 563087.
